 NOWO FURNITURE

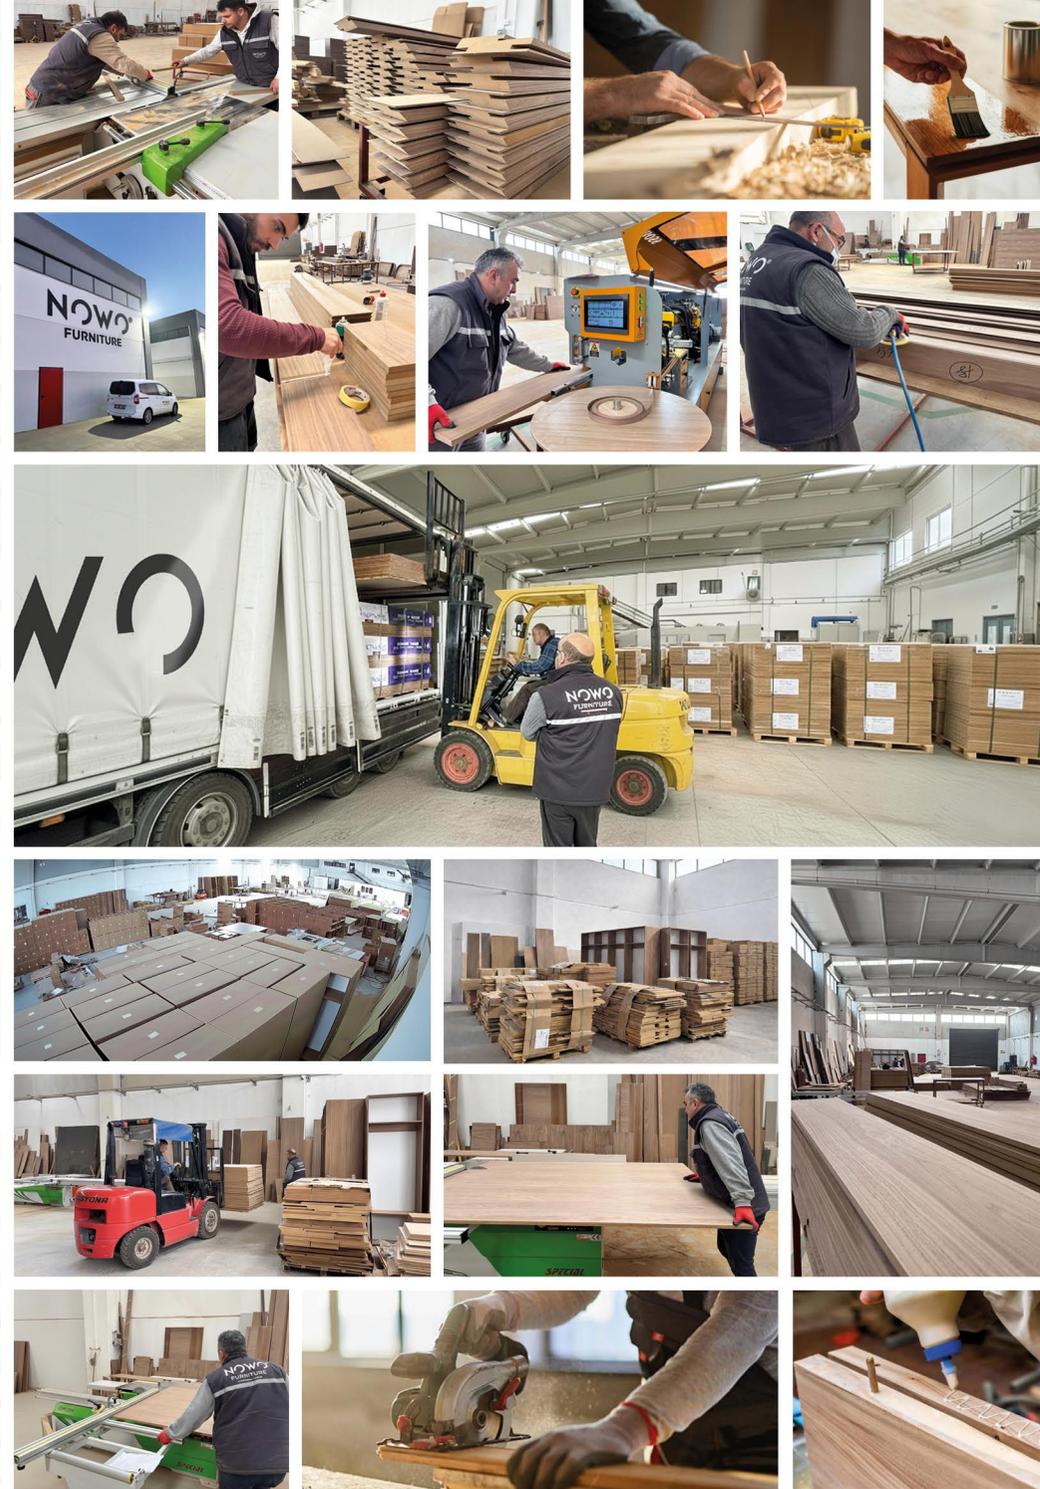

F U R N I T U R E

Nowo is a company consisting of architects, designers, and project specialists; it offers integrated design, production, and implementation solutions for construction, living, and work spaces. Founded in Denizli in 2009, Nowo has developed architectural and interior design projects of various scales since its inception, specializing particularly in hotel and accommodation projects. It continues its activities by combining the experience it has gained in hotel, residential, villa, commercial space, and office projects with an open approach to international collaborations and a project-focused mindset.

Nowo Atölye, which began operations in 2023, takes the brand's production capabilities to the next level, offering high-quality solutions for project-based wood applications, fixed furniture (casegoods), and FF&E production.

With our modern production infrastructure and expert solution network, we manage the end-to-end design development, production, and on-site installation processes for "custom-made furniture" and interior elements for hotel and accommodation projects. Nowo positions itself as a reliable, scalable, and internationally standardized solution partner for investors, developers, and project management firms with its approach that combines design sensitivity with production discipline and field experience.
